WHISK(E)Y

EUROPE | SCOTLAND

Scotch whisky is malt whisky or grain whisky made in Scotland, you can find single or blended scotches. They must be aged in oak barrels for at least three years. Any age statement on a bottle of Scotch whisky, expressed in numerical form, must reflect the age of the youngest whisky used to produce that product. The distillation is made in pot stills two times; the ageing is made in different types of oak.

We have chosen some whiskeys to create a various selection of single malt whiskeys.
